SUMMARY

Self-taught **Full-Stack Web Developer** with 3+ years of experience building scalable web applications, business platforms, and social discovery products. Skilled in **PHP (CodeIgniter), Ruby on Rails, PostgreSQL, MySQL, and modern front-end frameworks like React, React Native**. Proven ability to modernize legacy systems, design efficient databases, and deliver user-friendly interfaces. Strong track record of owning the **full development lifecycle** and driving measurable business impact.

PROFESSIONAL EXPERIENCE

Full-Stack Developer

ZamFIND Technology – Lusaka, Zambia | 2022 – Present

- Lead developer of **Ayia.online**, a POS and business management platform used by **20+ sales and marketing staff**.
- Migrated legacy system from **CodeIgniter 3 → CodeIgniter 4**, cutting technical debt and boosting performance by **~30%**.
- Optimized **MySQL database schemas**, improving query efficiency and supporting **thousands of monthly transactions**.
- Enhanced front-end performance by refactoring **jQuery/Bootstrap UI**, reducing load times by **25%**.
- Implemented **RBAC** to secure transactions and enable real-time sales analytics for managers.
- Built **inventory and accounting modules**, reducing reconciliation time by **40%** and improving financial reporting accuracy.
- Added **event management features** to capture **hundreds of client leads per event**, increasing sales follow-up effectiveness.

- Sole developer responsible for **requirements, architecture, coding, testing, deployment, and maintenance**.

PROJECTS

POTBELLY
food-storefront.onrender.com | Ruby on Rails, Hotwire, TailwindCSS, PostgreSQL

- Built a **location-based food discovery platform** blending e-commerce storefronts with social networking.
- Implemented **72-hour check-ins & chatroom expirations**, driving urgency and repeat engagement.
- Supported **multi-storefronts** (restaurants, bakeries, farm shops) with tailored seller workflows.
- Developed **seller engagement features** (product posts, videos) and **buyer engagement loops** (follows, events, broadcasts).
- Leveraged **Rails + Hotwire** for real-time updates and **PostgreSQL** for scalable data handling.
- Delivered a **mobile-first, modern UI** with TailwindCSS.
